

BRANDI LOZIER

4 ½ Month Saline Abortion Survivor

Hello,

My name is Brandi Lozier. I am 25 years old, and I am an actual abortion survivor. I was burned alive in my mom's womb at 4½ months gestation by a saline abortion.

The clear intent was to kill me!

By the Grace of God, I survived the abortion. My aunt raised me. I am here to be a voice for those who will NEVER have a voice.

Unborn babies, like I was, are told that we have "NO RIGHTS" and "NO CHOICE" which is WRONG!

When you are talking to me, you are talking to the face of "choice"!

I am alive, and therefore the REALITY of abortion. Abortion can be ignored and/or "falsely justified". However, it CANNOT be denied, and it is **never truly justified!**

When I was 15 years old, my Aunt who raised me, died, and I went to live with my Mother. My Mother did not accept me, and does not love me to this day. My Father is a violent alcoholic and a drug addict. He divorced my Mom when I was young, and he has not been a part of my life. I have mixed feelings toward my parents and I struggle to honor them as I am commanded by God to do.

In 2003, when I was 19 years old, I was raped twice by the same man, and became pregnant. He paid to have an abortion done on me, and I, unfortunately, did not stop it. It was an illegal abortion performed in my home state of Louisiana, where abortions are closely regulated. Therefore, I know and understand both sides of the abortion issue very well, and I

understand the limits of what the law can do. **I know that love is stronger and more important than the law.**

I have been involved in proLife activism my entire adult life and I will literally lay my life down for the sake of unborn children without hesitation.

LOOK AT ME. I AM THE FACE OF "CHOICE"!

When I was born, **THIS is what I looked like...**

NEVER expected to SURVIVE at all, but God had other plans...

These babies were killed by an injection of a concentrated saline (salt) solution into their mother's womb. It burned their skin off them while they were still alive. The babies also breathe it in and swallow it, frying their insides. Some of these babies are then born alive despite this torture, and are then "disposed of."

Babies killed by saline abortions are burned alive, inside and out, and thrown into the trash. A few are born alive, and are left to die. This is what was SUPPOSED to happen to me, but God had other plans...

Living Abortion Survivors

The number of abortion survivors worldwide is unknown. A common abortion survivor situation is that of twins or triplets, wherein only one or two of the babies are aborted, leaving another child unharmed. These survivors, however, are not typically counted as abortion survivors. Also, chemical abortion survivors are typically not counted. Nevertheless, in the USA alone, there are scores of documented cases of abortion survivors that do not involve chemical abortion, nor multiple pregnancy abortions. Here are five examples:

Brandi Lozier, whose story appears on page one, is from New Orleans, LA. She is shown here in 2008 with Mark Gietzen, outside the Tiller Late-term Abortion Facility in Wichita, KS. Brandi saved the lives of many unborn babies, by her compelling one-on-one testimony

given to the mothers who were going into Tiller's facility for late-term abortions.

Gianna Jessen came into the world in 1977 in a Los Angeles, CA abortion facility. Like Brandi and others, Gianna survived a saline abortion. Also like Brandi, Gianna has cerebral palsy and other adverse medical conditions as a result of the abortion

that was intended to kill her. Gianna is now a world-renowned speaker and Christian recording artist, whose powerful message can be seen on numerous YouTube videos. In this 2008 photo, Gianna is speaking to The Parliament in Australia.

When she was a teenager, Gianna visited Wichita, KS with her adoptive mother, and sang beautifully. She now lives in Nashville, TN.

Ana Rosa Rodriguez is missing her right arm because it was ripped off during an abortion in October of 1991. Her 19-year-old mother was 32 weeks pregnant at the time of the abortion on New York's Lower East Side.

The abortionist, Abu Hayat, was interrupted, and Rosa's mother was told to come back the following day to complete the abortion. However, that evening, Ana Rosa was born alive! Aside from the loss of her right arm, Ana Rosa is perfectly healthy.

In 1980 **Christelle Morrison** (*no photo available*) was aborted at 28 weeks gestation. Weighing a mere two pounds, baby Christelle was left to die, naked, alone and helpless, lying with medical waste, in the snow. She was found, blue and lifeless, and was rushed to a medical center in Reno, NV, where a physician placed her in a tub of warm water. She came to life, survived, and was adopted!

On July 13, 1993 **Sarah Brown** was 36 weeks gestation, when Abortionist Tiller

tried to kill her in Wichita, KS. Intending to inject poison into Sarah's heart with a long needle while she was still in her mother's womb, Tiller missed his target; and instead he stabbed and injected Sarah three times in the head and neck. Two days later Sarah was born alive in a hospital, weighing 7-lb.s 5-oz.s, but was blind and severely disabled for life. She was adopted and lived to be 5 years old.
